

(DISH) WASHER RACK

WR-02

Dishwasher racks used to store dishes during washing, transport, and storage. They are designed to keep the dishes upright, preventing them from rubbing or knocking against each other, which could cause damage or breakage. These racks can be stacked on top of each other for saving storage space.

KEY FEATURES

Used for washing dishes
Each 20ft can load 1176 pcs
Compatible with dishwashers for restaurants and hotels

- The values indicated are approximate and are based on practical experience and ISO 8611-, evenly distributed load over pallet surface, at ambient temperature (23° C) for a specific time. Different load conditions produce different values that have to be checked at the customer's request. Any deterioration or breakage in the pallet may vary these results.
- Due to the characteristics of plastic materials and manufacturing process, the dimensions and the weight of the pallets may present certain tolerances.
- The specification can be affected in case of alteration of the product with parts and / or materials different from those approved by the RePal quality department.
- RePal reserves the right to modify any information herein indicated without prior notice.
- Any warranty, specification or liability on the part of RePal will be terminated in case of modification of the product with spare parts not supplied by RePal.
